

Intune Weekly

Your weekly briefing on what's next in Microsoft Intune

COVERING MAY 12 - 18, 2026

Curated by Ugur Koc

YellowKey BitLocker bypass, Hotpatch silently enabled, and Secure Boot certs expiring June 2026.

BROUGHT TO YOU BY

ON THE RADAR

YellowKey BitLocker Bypass – No Official Patch Yet

Admins managing standalone Windows devices must evaluate disabling WinRE immediately as the only confirmed mitigation until Microsoft issues a fix; Entra-joined devices appear protected but should be verified.

MICROSOFT - LEARN

Hotpatch Silently Enabled Tenant-Wide from May 12

Admins may be unaware devices are running hotpatch builds instead of the standard May CU, and those rolling out Secure Boot cert updates should expect additional unexpected reboots until the quarterly baseline CU applies.

REDDIT

Intune Admin Center 'Access Denied' Outage on May 18

Multiple admins lost access to the Intune admin center despite holding valid admin roles, and the Azure status page incorrectly showed all healthy - admins should know to open a support ticket rather than rely on the status page during future incidents.

REDDIT

Secure Boot Certificates Expiring June 2026 – Rollout Planning Urgent

With expiry less than 13 months away and hotpatch now delaying certificate delivery to quarterly CU cycles, admins should use the updated Autopatch Secure Boot Status report now to identify unready devices and sequence rollouts.

MICROSOFT - RELEASE HEALTH

Intune Data Warehouse Beta Power BI Connector Retiring

The gradual retirement began in late April 2026 and any Power BI reports built before November 2025 will lose data access if not migrated to connector v2 or the OData Feed connector immediately.

MICROSOFT - IN DEVELOPMENT

COMMUNITY SPOTLIGHT

Simon Skotheimsvik

1PhoneMirror

A Windows-based screen-mirroring receiver built for Intune admins who need consistent, framed mobile screens for documentation and training. Supports iOS/macOS AirPlay (with optional PIN), Android wireless debugging via bundled adb/scrcpy, and experimental Miracast, with one-click screenshots or MP4/GIF recordings inside a device frame. Multiple devices stay paired and can be switched from a bottom bezel, with no app installs on the phones.

Landing in your tenant soon

Platform SSO with Registration During Automated Device Enrollment Now GA for macOS

INFO **ALL** **MAC** MICROSOFT - LEARN - A new "Enable Registration During Setup" setting for Platform SSO during ADE is now generally available for macOS, requiring Company Portal 5.2604.0 or newer; users can sign in with their Entra account during Setup Assistant, streamlining the out-of-box experience.

Intune Data Warehouse Beta Connector in Power BI Retiring - Transition Now

ADVISORY **ALL** **CROSS** **ACTION REQUIRED** MICROSOFT - IN DEVELOPMENT - The Intune Data Warehouse (beta) Power BI connector began retiring in late April 2026 with a gradual two-week transition; reports created before November 2025 must be migrated to the Intune connector v2 or OData Feed connector or data access will be lost.

[Read more](#)

Hotpatch Now On by Default - Conflict with Secure Boot Cert Rollout

ADVISORY **ENT** **WIN** **MS ACK** MICROSOFT - IN DEVELOPMENT - Microsoft enabled Hotpatch by default across tenants from May 12; because Secure Boot certificate whitelist updates ship only in quarterly baseline CUs (not hotpatches), admins actively rolling out Secure Boot cert updates may see additional unexpected reboots until the quarterly update applies.

Enrollment Time Grouping for Apple ADE Policies Going GA

INFO **ENT** **IOS** **MAC** MICROSOFT - IN DEVELOPMENT - Enrollment Time Grouping (ETG) for new iOS/iPadOS and macOS ADE enrollment policies is moving to GA, pre-computing applicable policies and apps at enrollment time to accelerate initial device configuration delivery.

Updated Secure Boot Status Report in Windows Autopatch Now Available

INFO **ENT** **WIN** BLOG - WINDOWS IT PRO - The improved Secure Boot Status report in Windows Autopatch now surfaces certificate-level detail, trust configuration, and device readiness - directly supporting the Secure Boot certificate rollout workflow ahead of June 2026 certificate expirations.

On the horizon

Android Personally Owned Work Profile Devices Moving to Android Management API (AMAPI)

ADVISORY **ALL** **AND** MICROSOFT - IN DEVELOPMENT - Intune is migrating personally owned work profile enrollment to AMAPI, bringing web-based enrollment (no app required, tenant-wide) and a new policy delivery model; admins should plan for behavioral changes and validate existing policies before the migration reaches their tenants.

Controlled Configuration for Microsoft Defender Antivirus Settings Coming to Public Preview

ADVISORY **ENT** **WIN** **PREVIEW** MICROSOFT - IN DEVELOPMENT - Controlled Configuration will make Intune and Defender for Endpoint the single source of truth for antivirus settings, overriding Group Policy, Configuration Manager, and local changes; admins with mixed management stacks should assess the impact before enabling.

[Read more](#)

Strict Tunnel Mode for Microsoft Tunnel on Android (AMAPI Devices)

INFO **ENT** **AND** **PREVIEW** MICROSOFT - IN DEVELOPMENT - Strict Tunnel Mode will force all network traffic through the VPN on Android Enterprise AMAPI-enrolled devices and block all traffic if the VPN drops; an app exclusion list can be configured, but legacy EMM API work profile devices must first migrate to AMAPI to benefit.

Multiple Managed Accounts for App Protection Policies Coming to iOS and Android

INFO **ENT** **IOS** **AND** **PREVIEW** MICROSOFT - IN DEVELOPMENT - The Multiple Managed Accounts feature for MAM will let users run more than one managed account within a single app with independently enforced app protection policies per account, useful for consultants, acquisitions, and multi-mailbox scenarios.

[Read more](#)

Device Control Policy Support Extended to Defender for Endpoint Security Settings Management

ADVISORY **ENT** **WIN** MICROSOFT - IN DEVELOPMENT - Intune Device Control (Attack Surface Reduction) policies will apply to Windows devices managed via Defender for Endpoint security settings management even without Intune enrollment - admins should audit existing policy assignments before this ships to avoid unintended enforcement.

[Read more](#)

Scope Tags to be Enforced on EPM Reports

INFO **ENT** **WIN** **SUITE** MICROSOFT - IN DEVELOPMENT - EPM reports will be updated to respect the report viewer's assigned scope tags, restricting visibility to only the users and devices within their scope - a fix for a known gap in RBAC enforcement for Endpoint Privilege Management.

[Read more](#)

In-Place Renewal for Cloud PKI Issuing Certificate Authorities

INFO **ENT** **CROSS** **SUITE** MICROSOFT - IN DEVELOPMENT - Admins will soon be able to renew Cloud PKI issuing CAs in place without creating new CAs or updating SCEP profiles, reducing operational overhead and configuration risk around CA expiry.

[Read more](#)

Custom Compliance Settings Coming to macOS

INFO **ALL** **MAC** MICROSOFT - IN DEVELOPMENT - Intune will extend custom compliance (script + JSON rules) to macOS, matching existing Windows and Linux support, with results surfacing in standard compliance reporting.

[Read more](#)

Client-Driven Compliance Evaluation for Windows Devices Coming to Preview

INFO **ENT** **WIN** **PREVIEW** MICROSOFT - IN DEVELOPMENT - Supported Windows devices will proactively request a compliance re-evaluation when a relevant state change is detected locally, reducing delays in compliance reporting and Conditional Access access decisions.

[Read more](#)

New STIG Audit Security Baseline for GCC High Tenants

INFO **ENT** **WIN** MICROSOFT - IN DEVELOPMENT - A new Intune security baseline focused on auditing device compliance against DISA STIG recommended configurations will be available for US GCC High tenants, generating per-device compliance reports without enforcing configuration changes.

[Read more](#)

New 802.1x Wired Networks Profile for iOS/iPadOS

INFO **ENT** **IOS** MICROSOFT - IN DEVELOPMENT - A new Wired Networks device configuration profile for iOS/iPadOS will support 802.1x EAP-based Ethernet access controls, enabling M-series iPads to securely connect to wired docks in enterprise environments such as education and finance.

[Read more](#)

Disable MAC Address Randomization Setting for macOS Wi-Fi Profiles

INFO **ENT** **MAC** MICROSOFT - IN DEVELOPMENT - A new setting in macOS Wi-Fi profiles will allow admins to disable MAC address randomization, restoring compatibility with Network Access Control solutions that rely on static MAC addresses.

[Read more](#)

Block Bluetooth Sharing Setting Added to Android Enterprise Settings Catalog

INFO **ALL** **AND** MICROSOFT - IN DEVELOPMENT - A new "Block Bluetooth Sharing" setting will be added to the Android Enterprise settings catalog, with behavioral differences between fully managed/dedicated devices (allowed when set to false) and corporate-owned work profile devices (blocked when set to false).

[Read more](#)

Grant Enhanced Security Permissions to MTD App on Android Enterprise

INFO **ENT** **AND** MICROSOFT - IN DEVELOPMENT - Admins will be able to use the MTD connector to grant a chosen MTD app (such as Defender for Endpoint) enhanced Android security permissions, exempting it from app suspension, hibernation, and user-initiated restrictions on managed devices.

[Read more](#)

Silence Apps on Managed Home Screen During Authentication Prompts

INFO **ENT** **AND** MICROSOFT - IN DEVELOPMENT - A new opt-in feature for Managed Home Screen will silence apps (blocking activities, notifications, toasts, and ringing) while MHS is prompting for authentication, with an allowlist for critical apps such as phone calls, to prevent session PIN bypass.

[Read more](#)

Agentic Identity for the Policy Configuration Agent Coming to Public Preview

INFO **ENT** **WIN** **PREVIEW** MICROSOFT - IN DEVELOPMENT - The Intune Policy Configuration Agent will migrate from human user identity to a Microsoft Entra agentic identity; existing agents require a manual transition via the Settings tab, while new agents will auto-provision the agentic identity at setup.

Action required

Secure Boot Certificates Begin Expiring June 2026 - Plan Your Rollout Now

CRITICAL **ENT** **WIN** **ACTION REQUIRED** MICROSOFT - RELEASE HEALTH - Secure Boot certificates start expiring in June 2026; Microsoft hosted a May 18 AMA and updated the Autopatch Secure Boot Status report to help admins identify unready devices and plan certificate rollouts before expiry causes boot failures.

[Read more](#)

Intune Data Warehouse Beta Power BI Connector Retiring - Migrate Before Data Access Ends

CRITICAL **ALL** **CROSS** **ACTION REQUIRED** MICROSOFT - IN DEVELOPMENT - The Intune Data Warehouse beta connector in Power BI is being retired in a gradual rollout that began late April 2026; any Power BI reports built before November 2025 must be migrated to connector v2 or the OData Feed connector immediately or data access will cease.

[Read more](#)

YellowKey BitLocker Bypass - No Official Patch Yet, Evaluate Mitigations

CRITICAL **ENT** **WIN** *MS ACK* **ACTION REQUIRED** MICROSOFT - LEARN - The YellowKey vulnerability allows BitLocker bypass via WinRE on standalone Windows devices without TPM+PIN; field testing confirms it does not work on Entra-joined or Entra hybrid-joined devices, and the current community-identified mitigation is to disable WinRE until Microsoft issues a fix.

From the field

Widespread "Access Denied" Errors Hit Intune Admin Center - Unacknowledged on Status Page

CRITICAL **ALL** **CROSS** *CONFIRMED* REDDIT - R/INTUNE - On May 18, multiple admins reported widespread "Access Denied" and "unauthorized" errors across the Intune admin center despite holding valid Intune Administrator and Global Administrator roles; the Azure status page incorrectly showed all services healthy, and Microsoft reportedly acknowledged the issue only via support tickets.

[Read more](#)

Hotpatch Silently Enabled by Default - Many Admins Unaware

ADVISORY **ALL** **WIN** *CONFIRMED* REDDIT - R/INTUNE - Admins discovering devices on OS build 10.0.26200.8390 (hotpatch) instead of the standard May CU build are finding that hotpatch was quietly enabled tenant-wide from May 12 via a setting in the Tenant Admin blade; a banner notification was present in the Autopatch blade but easily missed.

[Read more](#)

YellowKey BitLocker Bypass: Field Testing Shows Entra-Joined Devices Appear Protected

ADVISORY **ENT** **WIN** *CONFIRMED* REDDIT - R/SYSADMIN - Community testing of the YellowKey BitLocker bypass confirms it works on standalone Windows machines but fails on Entra-joined and Entra hybrid-joined devices; disabling WinRE is the current workaround, and TPM+PIN is expected to block the published PoC (the PIN PoC has not been released).

[Read more](#)

Autopatch Upgrading Devices from 23H2 to 25H2 Takes 40+ Minutes - Not a Bug

ADVISORY **ENT** **WIN** *CONFIRMED* REDDIT - R/INTUNE - Admins onboarding new devices to Autopatch are seeing 40-minute update windows when devices are on 23H2 being upgraded to 25H2, because 23H2 requires a full feature update rather than the fast enablement package used for 24H2-to-25H2; mixing version cohorts in the same Autopatch group is the root cause.
