

Intune Weekly

Your weekly briefing on what's next in Microsoft Intune

COVERING MAY 5 - 11, 2026

Curated by Ugur Koc

Tunnel servers stuck, BYOD blocked from Cloud PC, and Power BI connector retiring now.

BROUGHT TO YOU BY

ON THE RADAR

Tunnel servers on v20260129.1 stuck - reinstall required

Servers on the early-March Tunnel release are not functioning correctly and Microsoft has published a remediation script; admins must act now or deploy version 20260330.1 or later.

BLOG - CUSTOMER SUCCESS

Power BI Intune beta connector retiring - no grace period

The two-week retirement window is already rolling out and once complete all data access stops, so any reports built before November 2025 must be migrated to connector v2 or OData Feed immediately.

MICROSOFT - IN DEVELOPMENT

BYOD devices blocked from Windows 365 Cloud PC via CA

The Windows 365 Client app cannot be individually excluded in Conditional Access compliance policies, causing BYOD devices to be blocked from Cloud PC with no clean workaround yet from Microsoft.

MICROSOFT - MESSAGE CENTER

Enhanced App Inventory Graph API returning forbidden errors

Multiple admins confirm the /deviceInventories endpoint is inaccessible via Graph Explorer and PowerShell with no official workaround, blocking automation built around the newly shipped feature.

REDDIT

M365 suites gaining Intune Plan 2 and Remote Help mid-June

Intune Remote Help, Advanced Analytics, and Plan 2 capabilities begin rolling into Microsoft 365, Office 365, and EMS suites from mid-June, requiring licensing and budget review before rollout completes August 1.

MICROSOFT - MESSAGE CENTER

COMMUNITY SPOTLIGHT

Maurice Daly

Driver Automation Tool

A PowerShell WPF desktop app that automates the full lifecycle of OEM driver and BIOS package management for ConfigMgr and Intune. It discovers vendor catalogs, downloads with resume-enabled curl, extracts, builds WIMs, and wraps packages as .intunewin for Win32 deployment. Multi-OEM support, BIOS update handling, hash verification, and configurable packaging (DISM/wimlib/7-Zip) collapse hours of manual driver work into a single signed workflow.

Landing in your tenant soon

Outlook for iOS/Android: Admins Can Allow Users to Override Default Compose Font

ADVISORY **ALL** **IOS** **AND** MICROSOFT - MESSAGE CENTER - Starting early June 2026 (complete by late June), a new Intune app configuration policy key lets admins decide whether users can modify the default compose font name or size in Outlook for iOS and Android. No action needed unless you want to lock down or explicitly permit user overrides.

Intune Data Warehouse Beta Connector Retiring in Power BI

ADVISORY **ALL** **CROSS** MICROSOFT - IN DEVELOPMENT - The legacy Intune Data Warehouse (beta) connector in Power BI began its two-week retirement transition in late April 2026; after it completes, data access via the beta connector stops entirely. Admins with Power BI reports built before November 2025 must migrate to connector v2 or the OData Feed connector now.

M365 2026 Packaging Update Brings Intune Remote Help, Advanced Analytics, and Plan 2 Features to More Suites

ADVISORY **ALL** **CROSS** MICROSOFT - MESSAGE CENTER - Starting mid-June 2026 and completing by August 1, Intune Remote Help, Advanced Analytics, and Intune Plan 2 capabilities (Tunnel for MAM, FOTA, specialty device management) begin rolling into Microsoft 365, Office 365, and EMS suites. Review the licensing blog to confirm which SKUs gain access and update procurement or budget plans accordingly.

On the horizon

Android Enterprise Personally Owned Work Profile Migrating to Android Management API (AMAPI)

ADVISORY **ENT** **AND** MICROSOFT - IN DEVELOPMENT - Intune is shifting personally owned Android work profile enrollment to AMAPI, bringing web-based enrollment (no app install required), a modernised policy delivery engine, and tenant-wide rollout. Admins should review existing configurations for compatibility impacts as the legacy EMM API path is phased out.

[Read more](#)

Controlled Configuration for Microsoft Defender Antivirus Settings (Public Preview)

ADVISORY **ENT** **WIN** MICROSOFT - IN DEVELOPMENT - Controlled Configuration makes Intune and Defender for Endpoint the single authoritative source for antivirus settings, overriding Group Policy, Configuration Manager, and local changes. It extends Tamper Protection by locking settings to admin-defined values rather than just defaults - admins should audit current multi-channel configurations before enabling.

[Read more](#)

Strict Tunnel Mode for Microsoft Tunnel on Android Enterprise (AMAPI)

ADVISORY **ENT** **AND** MICROSOFT - IN DEVELOPMENT - Strict Tunnel Mode will block all network traffic on Android Enterprise devices if the VPN connection drops, with an optional per-app exclusion list. Only devices enrolled via AMAPI are supported; legacy EMM API work profile devices must migrate first.

[Read more](#)

Device Control Policy Support Extended to Defender for Endpoint Security Settings Management

ADVISORY **ENT** **WIN** MICROSOFT - IN DEVELOPMENT - Intune Device Control (Attack Surface Reduction) policies will apply to Windows devices managed via Defender for Endpoint security settings management even when not enrolled in Intune. Admins should audit existing Device Control policy assignments before this ships to avoid unintended enforcement on MDE-only devices.

[Read more](#)

Multiple Managed Accounts for App Protection Policies (iOS/Android)

INFO **ENT** **IOS** **AND** MICROSOFT - IN DEVELOPMENT - The new Multiple Managed Accounts capability lets users add more than one managed account in a single MAM-protected app, with app protection policies enforced independently per account. Especially useful for consultants, post-acquisition scenarios, or users managing multiple mailboxes.

Enrollment Time Grouping for Apple ADE Policies Going GA

INFO **ENT** **MAC** **IOS** MICROSOFT - IN DEVELOPMENT - Enrollment time grouping (ETG) will GA for new iOS/iPadOS and macOS ADE enrollment policies, pre-computing applicable policies and apps at enrollment time for faster, more consistent device provisioning across multiple authentication methods.

[Read more](#)

Platform SSO Registration During macOS Automated Device Enrollment

INFO **ENT** **MAC** MICROSOFT - IN DEVELOPMENT - Admins will be able to complete Platform SSO device registration inline during macOS ADE setup by combining a settings catalog policy with Setup Assistant modern authentication and await final configuration. Users currently sign in twice; Microsoft notes work is ongoing to reduce that to a single sign-in.

Custom Compliance Settings Coming to macOS

INFO **ALL** **MAC** MICROSOFT - IN DEVELOPMENT - Script-and-JSON-based custom compliance checks, already available for Windows and Linux, are coming to macOS, with results surfaced alongside standard compliance reporting in the Intune admin center.

[Read more](#)

Client-Driven Compliance Evaluation for Windows (Preview)

INFO **ALL** **WIN** MICROSOFT - IN DEVELOPMENT - Windows devices will proactively detect state changes locally and request compliance re-evaluation without waiting for the next scheduled check-in, giving admins faster remediation, reporting, and access decision updates.

[Read more](#)

In-Place Renewal for Cloud PKI Issuing CAs

INFO **ENT** **CROSS** **SUITE** MICROSOFT - IN DEVELOPMENT - Admins will be able to renew eligible Cloud PKI issuing CAs in place without creating new CAs or updating SCEP profiles, eliminating current operational overhead and configuration risk at CA expiry.

[Read more](#)

STIG Audit Security Baseline for GCC High Tenants

INFO **ENT** **WIN** MICROSOFT - IN DEVELOPMENT - A new security baseline targeting GCC High tenants will audit Windows devices against STIG-recommended configurations and generate detailed compliance reports - focused on auditing, not enforcement.

[Read more](#)

Scope Tags Support for Endpoint Privilege Management Reports

INFO **ENT** **WIN** **SUITE** MICROSOFT - IN DEVELOPMENT - EPM reports will be updated to respect the report viewer's assigned scope, showing only the users and devices within their scope rather than the full tenant view.

[Read more](#)

Agentic Identity for the Intune Policy Configuration Agent (Public Preview)

INFO **ENT** **CROSS** MICROSOFT - IN DEVELOPMENT - The Intune Policy Configuration Agent will shift from human user identity to a Microsoft Entra agentic identity, enabling secure autonomous policy actions. Existing agents must manually trigger the transition via Settings; new agents get agentic identity auto-provisioned at setup.

Grant Enhanced MTD Security Permissions on Android Enterprise

INFO **ENT** **AND** MICROSOFT - IN DEVELOPMENT - A new MTD connector option will let admins grant one MTD app (such as Defender for Endpoint or a supported third-party) elevated Android permissions, including exemption from app suspension, hibernation, and user-initiated restrictions on COPE, fully managed, and dedicated devices.

Silence Apps on Managed Home Screen During Authentication Prompts

INFO **ENT** **AND** MICROSOFT - IN DEVELOPMENT - A new opt-in MHS setting will suppress app activities, notifications, toasts, and dialogs whenever the session PIN or sign-in screen is active, with an allowlist for critical apps such as phone calls.

[Read more](#)

New Wired Networks (802.1x) Profile for iOS/iPadOS

INFO **ENT** **IOS** MICROSOFT - IN DEVELOPMENT - A new 802.1x Wired Networks configuration profile for iOS/iPadOS will support EAP protocols (TLS, PEAP, TTLS) and enable M-series iPads to securely connect to hot desk docks and monitors - mirroring the existing macOS wired network profile experience.

[Read more](#)

Disable MAC Address Randomization on macOS Wi-Fi Profiles

INFO **ALL** **MAC** MICROSOFT - IN DEVELOPMENT - A new Wi-Fi profile setting for macOS will allow admins to disable MAC address randomization on managed devices, restoring static-MAC-dependent functionality such as network access control (NAC).

[Read more](#)

Block Bluetooth Sharing Setting Added to Android Enterprise Settings Catalog

INFO **ENT** **AND** MICROSOFT - IN DEVELOPMENT - A new "Block Bluetooth Sharing" setting in the Android Enterprise settings catalog will prevent content sharing over Bluetooth on fully managed and dedicated devices; corporate-owned work profile devices already block this by default when set to False.

Action required

Microsoft Tunnel Servers on Version 20260129.1 Are Stuck - Reinstall or Run Patch Script

CRITICAL **ENT** **CROSS** **ACTION REQUIRED** **BLOG - CUSTOMER SUCCESS** - Servers upgraded to the early-March Tunnel release (20260129.1) can get stuck and fail to complete the upgrade; Microsoft has confirmed the issue and published a remediation script (mstunnel-patch-2602) as well as a clean upgrade path to version 20260330.1 or later. Admins on affected versions must act now - stuck servers are not functioning correctly.

Intune Data Warehouse Beta Connector in Power BI: Migrate Before Retirement Completes

CRITICAL **ENT** **CROSS** **ACTION REQUIRED** **MICROSOFT - IN DEVELOPMENT** - Transition began late April 2026 and is rolling out over two weeks - once complete, all data access via the beta connector is cut off with no grace period. Any Power BI reports built before November 2025 must be migrated to connector v2 or the OData Feed connector immediately.

BYOD Devices Blocked from Windows 365 Cloud PC by Conditional Access - No Clean Exclusion Path

ADVISORY **ENT** **WIN** **CONFIRMED** **MICROSOFT - MESSAGE CENTER** - Admins report the "Windows 365 Client" app (ID: 4fb5cc57-dbbc-4cdc-9595-748adff5f414) cannot be individually excluded in Conditional Access policies for compliance, causing BYOD devices to be blocked from Cloud PC despite exclusions for Azure Virtual Desktop, Windows 365, and Windows Cloud Login already being in place. Affected organisations should review CA policy scope and test named exclusions while awaiting Microsoft guidance.

Enhanced App Inventory Graph API Endpoint Returning Access Errors

ADVISORY **ALL** **WIN** **CONFIRMED** REDDIT - R/INTUNE - Multiple admins report the /deviceInventories Graph endpoint for the new Enhanced App Inventory feature is inaccessible via Graph Explorer and Invoke-MgRestMethod, consistently returning forbidden/access errors. No official acknowledgement or workaround documented yet.

macOS Platform SSO Still Widely Problematic Despite Microsoft Guidance

ADVISORY **ALL** **MAC** **CONFIRMED** REDDIT - R/INTUNE - Admins attempting to configure Entra ID SSO at the macOS login screen report persistent failures even after following all official documentation - common issues include the gray login screen blocking Entra credentials and PSSO not completing until after a local password login. Key finding: ensuring Company Portal is on the latest release before enrollment and using the correct authentication method order appears to be critical but is not clearly documented.
